

DMF Florence has a unique fence design on the panel curves, squared openings and post shape that enhance the beauty of any fencing project and keep strength and security as a priority.

Compared with traditional iron works is a highly cost competitive fencing solution.

FLORENCE

Ornamental Fence

Features and Benefits:

> Aesthetic

The shapes and curves of this fence make it a unique fencing solution for those projects looking for a fence that enhances their landscape beauty.

> Adaptable to any fencing project

Florence fence fits for any fencing project and is adaptable to plain or hilly surfaces or terrain.

> Easy to install

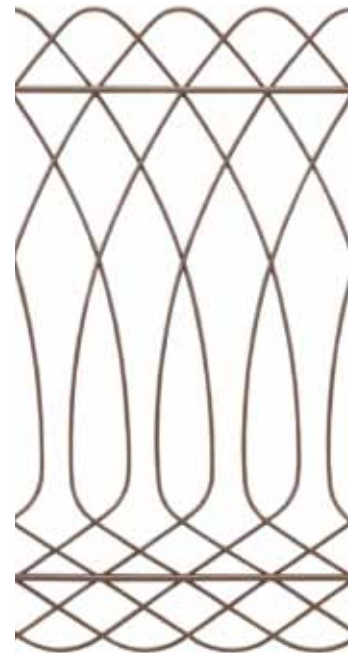

Designmaster - Florence fencing system is engineered with the right components to facilitate the installation job but keeping strength and security as a priority.

> Green

Designmaster fence products are made out of recyclable steel and manufactured with environmentally friendly processes. All products apply for LEED credits.

> Durable

Florence is a long lasting fence as all its elements are galvanized and powder coated with the highest manufacturing standards.
