

DMF Milan has a unique fence design on the panel curves, squared openings and post shape that enhance the beauty of any fencing project and keep strength and security as a priority.

Compared with traditional iron works is highly cost competitive fencing solution.

# MILAN

## Ornamental Fence

### Features and Benefits:

#### > Aesthetic

The shapes and curves of this fence make it a unique fencing solution for those projects looking for a fence that enhances their landscape beauty as well as protect them.

#### > Adaptable to any fencing project

Milan fence fits for any fencing project and is adaptable to plain or hilly surfaces or terrain.

#### > Easy to install

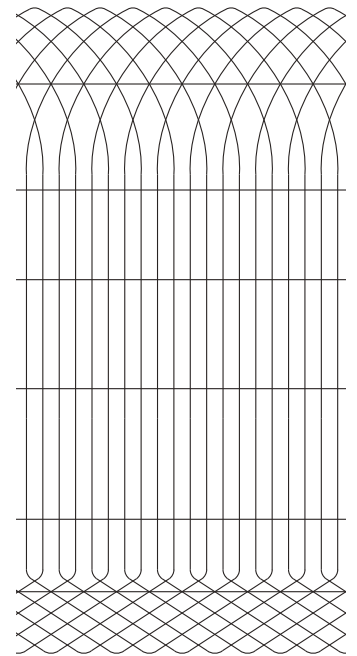

Designmaster - Milan fencing system is engineered with the right components to facilitate the installation job but keeping strength and security as a priority.

#### > Green

Designmaster fence products are made out of recyclable steel and manufactured with environmentally friendly processes. All products apply for LEED credits.

#### > Durable

Milan is a long lasting fence as all its elements are galvanized and powder coated with the highest manufacturing standards.
