

IMPASSE II

HIGH SECURITY STEEL PALISADE FENCING

THE FIRST LINE OF DEFENSE

Ameristar Fence Products is the world's leader for developing new products to help secure and protect at risk facilities. The Impasse II high security fence system is a heavy steel palisade fence system designed to provide the end user with a level of security not typically achieved with traditional chain link or architectural mesh fence systems.

DETER

The high-tensile steel corrugated pales provide a daunting appearance that towers above the rails of the Impasse II framework. Each connection point of the Impasse system is secured with tamper-proof fasteners providing the highest level of security and versatility.

DETECT

The unique design of the Impasse rail enables the fence system to become a platform for multiple security peripherals.

DELAY

The Impasse II security fence offers the resistive strength of heavy-duty steel spears secured vertically to a framework of specially formed steel rails and I-beam Posts.

We take great pride in manufacturing "Made in the USA" products. Ameristar is

located in Tulsa, Oklahoma and is American owned and operated.

Applications:

- Military Sites
- Government Facilities
- Petroleum & Chemical Facilities
- Power Plants & Substations
- Airports
- Data Centers
- Ports of Entry
- Water Treatment & Storage

Covered by or for use with one or more of the following U.S. patents: 6,874,767, 7,188,826, 7,651,073

IMPASSE II

HIGH SECURITY STEEL PALISADE FENCING

PANELS & POSTS

Impasse II panels and posts are manufactured using high-tensile pre-galvanized G-90 steel. Each component has been roll-formed into a unique profile that yields significant strength properties.

DESIGN

Impasse II's distinct design enables the fence to traverse aggressive changes in grade in order to maintain security along any perimeter. Each connection point of the Impasse II system is secured with tamper-proof fasteners providing the highest level of security and versatility.

GATES

Ameristar understands the importance of balancing perimeter security with the highest quality entry control gates. Impasse II has a wide variety of Swing, Slide, and Cantilever Gates to match any Entry.

Impasse II is produced using up to 96% post-industrial recycled steel.

INTEGRATION

The Impasse II rail can be used as a platform for multiple perimeter security elements. The Impasse II framework is a raceway for wiring, conduits, and/or security cabling required around the perimeter of a project. This integrated design eliminates the need for costly trenching and boring becoming a value added solution for perimeter security upgrades.

When installing the security elements use Impasse II as a platform:

Communication & Video cables
Intrusion Detection / Fiber Optic Cables
Access Control Wiring
Conduits
Anti-ram Cabling (Stalwart)

COATING & WARRANTY

Impasse II is coated using Ameristar's PermaCoat process, this dual-coat finish yields the best results for durability and weathering in the fence industry. Ameristar has over 25 years of experience and research in coating fence products allowing Impasse to support a 15 year warranty.

STYLES

Also available in Impasse II Anti-Scale pale spacing - 1.5" airspace

Item No. 9792 / Effective: 06/2012
