## V-Squared™ Panels

V-Squared Panels are an exciting new innovation in Temporary Security Fencing.

No longer will a project need to begin by installing a bent-up, bad looking construction fence that does not represent the quality of work that the architect and owners will expect from their contractor. Why have the first visual aspect of your project look bad and unprofessional? Set a positive and professional image for your job by beginning with a high quality, low cost V-Squared Panel construction fence.

The exclusive nesting design allows us to transport a greater number of panels to the job site with no fear of crushing or bending as happens with conventional tubing frames. This coupled with the ease of installation allows us to offer our customers a better product at a competitive price. The heavy galvanized construction insures minimal damage allowing for more panel cycles further lowering the price.

Since 1949

## Revolutionary Solutions. Real Benefits.

- Horizontal heavy 4 ga. wire with custom roll-form sections add strength and durability.
- All - welded construction eliminates snagging, loose fabric and sloppy/less secure connections.
- Visual on dust screens can easily be attached for added security.
- Your company logo or name can be added to screening at no cost or for a minimal charge.
- Architectural drawings of the finished project can now be scanned onto site screening adding to the anticipation of your completed project.
- Construction site theft can be as much as 1% of a projects cost. . . .secure your sites.
- Versatility is the key to this new concept in construction site security and design.

Visually appealing high quality construction fencing sends a message to the owners and the public that you are a contractor that is concerned with detail.

Let Seegars® Fence provide you a quote on your next project. You will find we will provide products that are competitive and get your project started in a professional and visually appealing manner. Visit our website and see how others have used our panels and screening. We know you will want this on your next project.

## Available Coatings

### HD galvanized
