

EndwoodTM Fence

A New Era
in Fencing.

ENDWOODTM
CAPPED CELLULAR PVC FENCING

By ENDURIS

You “wood knot” be able to enjoy this kind of relaxation with a typical wood fence...

New Endwood Fence gives you more than just a beautiful and rugged fence, you also get time to enjoy family and friends. No more staining, sanding, or sealing - EVER! Endwood Fence emulates all of the great things people love about wood - A rich hand-stained appearance with rough sewn texture and natural wood grain pattern yet without all the maintenance and upkeep. In fact, Endwood Fence comes with an industry first, exclusive 30 year Fade & Stain Resistant Warranty and may even outlast your home!

... with an Endwood Fence you can.

Endwood Fence

The Beginning of a New Era...

- Ultra-Low Maintenance
- Natural Wood Appearance
- 30-Year Fade & Stain Warranty
- No mold, rot, or splinters
- Impervious to termites

Endwood employs our exclusive HardCover™ capstock, a higher performance outer surface that can deliver years of proven weatherability.

Forget maintenance and upkeep. New Endwood Fence is engineered with an advanced cellular PVC core and our exclusive HardCover™ Capstock surface. This unique core prevents moisture absorption, provides superior fastener-holding strength and is impervious to common issues such as cracking, rotting and splintering. The advanced technology of the HardCover Capstock surface preserves the aesthetics of your fence, offering color retention and resistance to stains. There is no need for annual staining or sealing to maintain the rich vibrant colors and surface debris can be easily cleaned off with just a garden hose.

Wood's natural beauty ends...

Time and weather can really do a number on wood. The strong, rich color and natural grain that is so attractive on a new wood fence does not last. In a short amount of time, the sun can bleach out the deep color, leaving it pale and gray. Boards that were once straight and smooth become warped, cracked, and splintered. What once appeared strong and handsome now looks fragile, dull, and old.

Endwood's advantages over real wood fencing are

numerous. The rich colors—Sable, Slate and Sequoia—resist fading. Stains are easily hosed off with water and minimal elbow grease. Endwood will not splinter, crack, or break. Fasteners stay strongly attached—no nail-popping. Burrowing insects and animals will not weaken the structure. In fact, Endwood's fastener holding strength is much stronger than the same fastener used in wood.

...Endwood's beauty endures.

Lifetime Cost Analysis - Endwood v.s. the others

Annualized expenses included in Lifetime Cost Analysis

- Upkeep - repair and replacement costs due to product failure or damage; cracking, rotting, termites, nail pops, splintering, and loose boards.
- Maintenance - cleaning, sanding, staining, painting and/or sealing expenses.
- Life Expectancy - cost of fence replacement due to product failure.

Estimates based on national averages of expenses with an average fenced area of 200 lineal feet.

Not all fences are created equal.

The very first day after a wood or composite fence is installed, the maintenance and repair expenses start adding up. While at the same time, the life expectancy of the fence starts counting down.

Wood and composite fences require maintenance (cleaning, stain removal, staining, and sanding) to maintain their appearance and to extend its life. Repair and replacement of pickets, rails, and posts will have to be done as these fences begin to deteriorate and fail.

Those other fence materials may seem like a bargain at first, yet after these additional expenses are considered, the **"Real Cost"** doesn't seem like such a great deal anymore.

Rest assured Endwood Fence will never require this type of strenuous maintenance with annual sanding, staining, painting or board replacement and is impervious to bug infestation. This is the fence you purchase once and never have to worry about again other than the occasional light spray with the garden hose. In fact, Endwood fencing is engineered with such advanced cellular components, it may very well outlast your home.

Endwood Fence is sure to add value to your home. If you decide to sell your house, would you really want the added hassle of having to repair or replace your fence? Buyers today look for a home with a minimal amount of work needed. If it comes down to choosing between your home with a durable Endwood Fence or another with a fence in need of maintenance and repairs, which house do you think will sell first?

With an Endwood Fence, your leisure time is truly your time to enjoy the seclusion of your own backyard without the hassle of annual maintenance. Not only will you work less, your fence will keep looking fresh for many years to come.

How would you prefer to spend your weekends?
